

# Scalability & Future Plan

ComicCraft - AI Comic Story Creator using Gemini Models  
Madras Institute of Technology | Department of Computer Technology (CT) | III Year, V Semester  
Project period: 1 Oct 2026 - 2 Oct 2026

## Scalability

- Move image generation to a GPU worker/queue so web requests are not blocked
- Return a job id and poll for progress instead of one long request
- Cache outputs per prompt; clean up old panel files
- Paid Gemini tier or newer google-genai SDK for higher limits
- Run behind Unicorn/Uvicorn workers in Docker on a cloud GPU

## Future plan

| Item                       | Description                        | Priority |
|----------------------------|------------------------------------|----------|
| Continuous integration     | Run the pytest suite on every push | High     |
| Progress UI                | Live status per panel              | High     |
| Style preview/export pages | Match home page design             | Medium   |
| Speech bubbles             | Overlay captions on images         | Medium   |
| Character consistency      | IP-Adapter or LoRA                 | Medium   |
| SDXL or hosted image API   | Higher quality                     | Low      |
| Multi-language             | Story and CJK PDF fonts            | Low      |
| Accounts and gallery       | Save comics                        | Low      |
