

Data Flow Diagram

Date	2 October 2026
Team ID	12
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	2 Marks

Data Flow Diagram

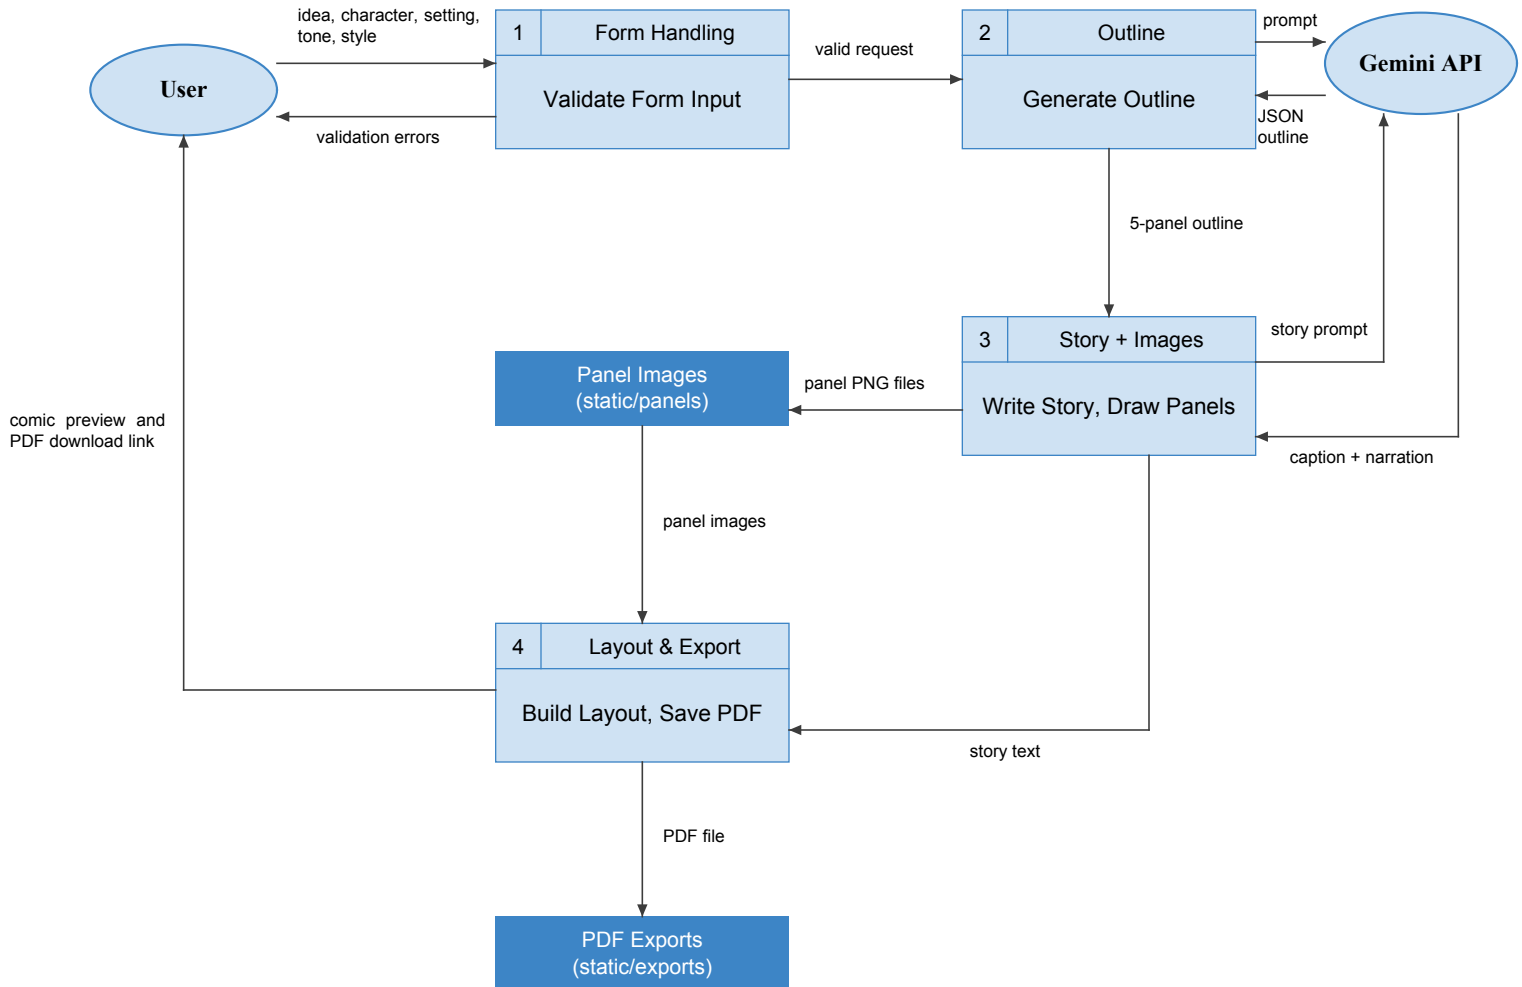

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., User, Gemini API).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Generate Outline, Build Layout).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., static/panels, static/exports).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

ComicCraft Data Flow Diagram

The diagram below shows how the symbols above come together in ComicCraft: the user's form data flows through the outline, story and image processes to the layout and the PDF.

Ref	Process / Store	Input	Output
1	Form Handling (routes.py)	Form fields	Validated request
2	Outline (gemini_flash.py)	Idea, character, setting, tone, style	5-panel JSON outline
3	Story + Images (gemini_pro.py, image_generator.py)	Outline	Caption/narration text, panel PNGs
4	Layout & Export (layout_builder.py, exporters.py)	Text and images	Preview data, PDF file
