

Project Executable Files

Date	2 October 2026
Team ID	12
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
ComicCraft/
  app/
    main.py      FastAPI app, warm-up thread
    routes.py    routes and pipeline (create_comic)
    gemini_flash.py  outline (JSON)
    gemini_pro.py  caption and narration
    image_generator.py Stable Diffusion pipeline
    layout_builder.py merge text and images
```

```

exporters.py    PDF export
templates/      index, comic_preview, export_success
static/         bg.jpg, fonts/, panels/, exports/
tests/         test_app.py, test_more.py (24 tests)
docs/          project documents and screenshots
requirements.txt requirements-dev.txt .env.example
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not hosted. Runs locally at http://127.0.0.1:8000
Login Credentials (Demo)	Not required (no login). Needs a GEMINI_API_KEY in .env
Platform / Hosting Provider	Local machine (Apple Silicon MPS; CUDA or CPU also work)
Repository Link	https://github.com/Chippiiiiiii/comic-craft
Demo Video Link	Not recorded

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

```

python -m venv env
source env/bin/activate
pip install -r requirements.txt
cp .env.example .env      # then set GEMINI_API_KEY
uvicorn app.main:app --port 8000
# open http://127.0.0.1:8000
# tests: pip install -r requirements-dev.txt && python -m pytest -q tests
  
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Gemini free tier: 5 requests/min and 20/day per model	Different models for outline and story; change model names in .env
2	First run downloads about 4 GB of Stable Diffusion weights	One-time download, then cached
3	Characters are not consistent between panels; CJK text unsupported in PDF	Listed in the future plan
