

Functional & Performance Testing Template

Model Performance Test

Date	2 October 2026
Team ID	12
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (story idea, genre)	Submit the form with valid text and with the idea or genre left empty	Valid inputs accepted, error for missing fields	Valid input accepted; missing fields rejected with a validation error	Pass
FT-02	Number Input Validation (panel count)	Enter panel counts inside and outside the allowed range	Accepts valid values, caps out-of-range values	Outline is capped at 5 panels and panel numbers are normalised	Pass
FT-03	Content Generation (outline, story, images, PDF)	Provide idea, genre and panel count and click Generate	Outline, story, panel images and PDF are produced	Outline, story, panel images and downloadable PDF produced; 24 automated tests pass	Pass
FT-04	API Connection Check	Run with the API key set and with it missing	API responds with a valid key; clear error without it	Gemini responds with a valid key; missing key raises a clear error	Pass
PT-01	Response Time Test	Time a full generation from click to finished PDF	Full comic in under 2 minutes	About 104 s end to end; about 12.4 s per panel image on Apple M5	Pass
PT-02	API Speed Test	Send repeated outline/story calls within one minute	App should not crash on rate limits	429 limit errors are caught and reported; second model shares the quota	Pass
PT-03	PDF Export Load Test	Export a comic with the maximum panel count	Should work smoothly without crashing	PDF with one page per panel is created and downloads correctly	Pass
