

Define Problem Statements

ComicCraft - AI Comic Story Creator using Gemini Models
Madras Institute of Technology | Department of Computer Technology (CT) | III Year, V Semester
Project period: 1 Oct 2026 - 2 Oct 2026

Problem

Making a comic needs three skills together: story writing, consistent illustration and page layout. Most people have ideas but lack the art or layout skills. Existing tools either need drawing ability or give single, disconnected images with no narrative.

Problem statement (who / what / why)

Question	Answer
Who has the problem	Students, teachers, hobby writers, parents, content creators
What is the problem	They cannot turn a story idea into an illustrated comic without drawing skills
Why does it matter	Visual stories engage readers and learners, but production takes hours or money
Where does it occur	Classroom projects, storyboarding, bedtime stories, social content
Desired outcome	A finished multi-panel comic and PDF from a one-line idea in minutes

Objectives

- Generate a 5-panel illustrated comic with captions and narration
- Give control through setting, tone and art style choices
- Export a PDF with no manual editing
- Run on one laptop (MPS, CUDA or CPU) using only a free Gemini API key

Success criteria

- End-to-end generation completes without manual steps
- Panel images follow the outline and style
- PDF contains five readable panels
